

Requesting a Network Deficiency for a Hospital Grade Breast Pump

Scenario 1: Member will obtain a breast pump upon delivery at the hospital.

To access medically necessary hospital-grade breast pumps (HGP) for a patient, the preferred vendor is Midwest Medical Equipment Solutions Inc. DBA Neb Medical (this will not be a rental). The vendor will deliver the HGP onsite and bill Aetna directly for Opera HGP. If Neb Medical is not an option, any of the Aetna contracted DME vendors can be utilized for HGP **rental**.

Scenario 2: Member wants to obtain a standard breast pump prior to delivery.

Standard breast pumps are also available through Neb Medical, however, if a patient would like to coordinate obtaining a pump on their own, they can use any of the Aetna contracted DME suppliers. Below is a link that can be shared with a list of participating suppliers.

*All hospital-grade rentals will require a prescription/order.

Aetna Contracted Vendors:

Midwest Medical Equipment Solutions Inc. DBA Neb Medical*

Yummy Mummy*

A Pumping Essentials*

A Breast Pump and More*

Acelleron Breast Pumps*

Aeroflow Inc.*
